

Virtual Perimeter Guard Services

Prevent loitering and deter crime by protecting your facilities' perimeter with autonomous AI-based cameras and voice-downs with live security expert intervention for persistent threats

Autonomous Monitoring + Human Intervention

The Interface Virtual Perimeter Guard solution includes an AI-enabled camera, audio player with speaker, and strobe lights designed to accurately detect people or vehicles and issue a series of calibrated voice-down commands to deter crime, escalating to Interface iSOC in case of persistent threats.

Autonomous System

Multiple Response Modes

U.S. Based Security Monitoring

Real-Time Detection & Response

Detect people or vehicles in areas that are off limits or after business hours and respond immediately as programmed.

Multi-Stage Messages

Escalating messages for continuous threats to issue warnings to prevent crime.

World-Class Security Monitoring

Escalate persistent threats or serious breaches to best in class, situationally trained live security monitoring specialists at Interface's US-based Interactive Security Operation Centers (iSOCs) in Dallas, TX, and St. Louis, MO.

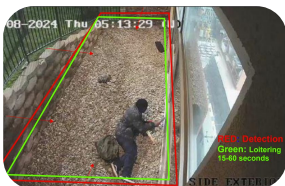

Event history with video evidence

User configurable dual modes for Loitering Prevention and Intrusion Prevention

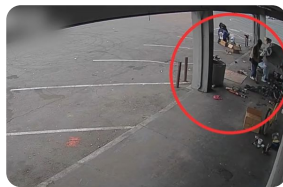

Expandable to up to four areas on a single unit

Tackle a Wide Variety of Security Threats with Confidence

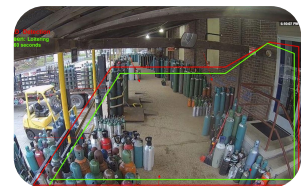

Prevent burglaries and vandalism

Stop loitering & vagrancy

Secure alleyways & less frequented spaces

Secure outdoor assets and inventory

Autonomous Monitoring + Interface iSOC Live Intervention for Comprehensive Threat Coverage

Detect loitering and vagrancy and respond with voice-down commands and strobe lights

Monitor for break-ins and unauthorized presence and respond instantly with human intervention from security experts

AI-enabled camera detects and tracks dwell time in restricted areas

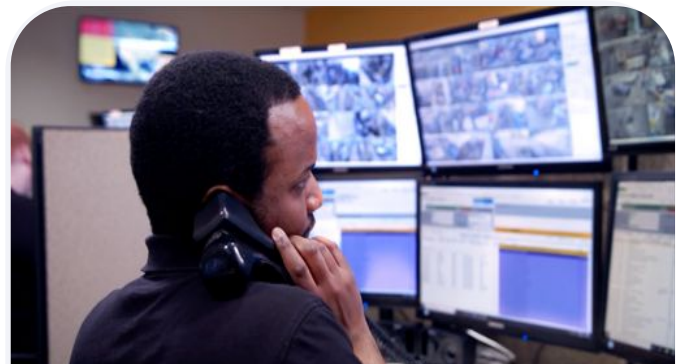

Plays a series of voice-down commands based on dwell detection

Escalates to iSOC for human monitoring and intervention for persistent threats

Enhance drive-thru security by detecting loitering or unauthorized vehicles

Escalate persistent threats to intervention specialists at iSOC who can intervene or dispatch law enforcement as needed
